

ASSIGNMENT- Mathematics

CHAPTER 03

Q1 Solve the following pair of linear equations:

(A) $2x + y = 7$, $x - 2y = 6$ by graphical method

(B) $9x - 10y = -12$, $2x + 3y = 30$ by substitution method and

C) $3x - 5y - 4 = 0$, $9x + 2y + 7 = 0$ by elimination method.
