

ASSIGNMENT- Maths

CHAPTER 07

Assignment

7. Find the coordinates of point A, where AB is the diameter of a circle whose centre is $(2, -3)$ and B is $(1, 4)$

Mid point formula

$$\text{Coordinates of } O = \left(\frac{x_1 + x_2}{2}, \frac{y_1 + y_2}{2} \right)$$

$$(2, -3) = \left(\begin{array}{c} \vdots \\ \vdots \end{array} \right)$$
